# MANY LICENSES

Although Three Months of the Year Have Gone By but Few Have Taken Out Permits-

ONE ICE WAGON IS LICENSED

Although nearly three months of the year have gone by, the records of the city license inspector show that of thirty-five moving picture houses have been licensed for this year. 10 cents per seat, with a minimum being as follows: annual fee of \$35. The regular theaters are assessed on the basis of \$150 for 1,000 or more seats.

This condition in the license inspector's office means that the city is being deprived of the use of considerable money. Only one ice company has taken out Bornses for their wagons, this prompt concern paying the fee of \$3 for each of eight wagons. According to this showing there are only eight ice wagons being legally operated in this city today.

Eighty-four licenses have been issued for pool and billiard halls. There was a total of 112 last year, Fourteen fortune tellers have taken out licenses.

Deputy License Inspector John Mathiesen is sending out a lot of notices to negligent persons who should have taken out licenses.

### More Proof

Here is more proof of the extent of the jail feeding graft in the bill which the sheriff is pushing to make the taxpayers of Douglas county pay him 40 cents per prisoner per day. Just examine these official figures showing what it costs the county to feed the always hungry boys and girls in the Riverview home:

For the year 1914 the daily only three of seven theaters and ten average number of inmates was 38.52. This served a total of 52,069 during the year 1914, at a cost of These licenses were all due January \$3,124.14, or six (6) cents per meal, 1. The rate for the picture shows is the itemized account of the above

Why should the taxpayers have to stand for a steal of 40 cents a day for feeding jail prisoners, half of the money to go into the pockets of the sheriff and his political partners as pure "velvet?"

### Do You Know the Real Food Value of Spaghetti?

When you talk about buying ten centa or one dollar's worth of any foodstuff, what do you mean by "worth?" The only measure of genuine worth in the purchase of eatables must be maririton. But do you keep nutrition in mind when you buy the family provisions? Let us see. Meat is probably your biggest item. Yet no less an authority than Dr. Hutchison, the dietilian, says that meat is a dear food. Why? Because we pay far too much for the amount of nutrition that we secure Meat contains 75 per cent water—think of that when sirioin is chalked up at 35c a lb.—three-quarters water!

chalked up at 35c a lb.—three-quarters water!

Now, take Faust Spaghetti, made from Durum wheat, a rich, glutinous cereal. Of spaghetti and its allied products, the same authority says that they contain only 10 per cent water, and these foods are absorbed almost in their entirety—go to make blood, muscle and tissue. Faust Spaghetti costs 16c a large package—nearly all worth.
